

ABSTRACT

A game of chance includes steps of accepting at least one of a wager and a selection of a predicted outcome of a competitive activity; randomly selecting an actual outcome of the competitive activity according to predetermined odds; accessing one of a plurality of video sequence that shows the randomly selected actual outcome of the competitive activity, and showing the accessed one of the plurality of video sequence on a display. A step may be carried out to pay a sum determined by the wager and the predetermined odds when the predicted outcome matches the randomly selected actual outcome.
